RENAISSANCE REVIEW

Imagine the Look, Create the Dream...

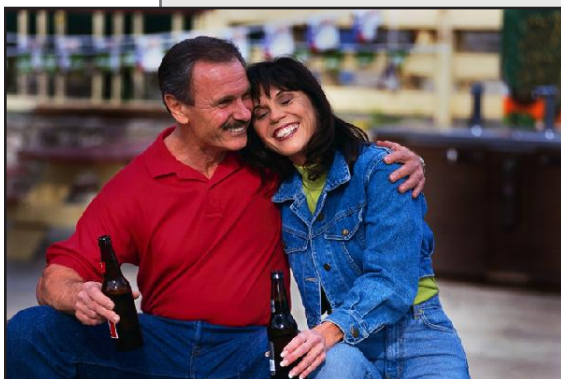

Happy New Year! Best wishes for a safe, prosperous, and healthy 2006 from the staff at the Aesthetic Surgery Center. Let us help you put your best face forward in the new year. Our physicians and aestheticians provide contemporary approaches to restoring a more youthful, yet natural appearance.

HOT OFF THE PRESSES: Radiesse is the Latest Filler Material!

Radiesse (formerly known as Radiance) is a synthetic injectable implant which can be used to correct your deep laugh lines and drool lines. The unique micro-sphere technology allows for gradual tissue ingrowth. Because Radiesse is made from the same minerals found in our bones, it is non-allergenic. It feels natural and lasts about 1 year, making it the ideal low down-time, injectable enhancement. Spend 30 minutes with one of our skilled physicians in the office, and look 5 years younger! Call us for more details about this revolutionary product.

State of the Art Hair Restoration Techniques

A natural hairline and a full head of hair can give one the confidence to succeed in both social and business endeavors. This procedure is perfect for men and women, whether the cause of hair loss is male pattern baldness or post-accident scalp scarring. Our skilled physicians carefully analyze your pattern of hair loss and use their aesthetic vision to formulate a surgical plan. Follicular unit micrografting is the technique of choice to minimize follicular damage, and preserve the way hairs grow naturally. Drs. Agarwal and Maloney strive to achieve natural results above all else.

Surprise Your Sweetheart With A Valentine's Day Gift From The Face Spa

Give your sweetheart some wet, hot, steamy Valentine's Day fun with one of our Lola's Liftoff Luxuries:

Shea Butter Soap or Honey Butter Soap lightly scented with orange blossoms!
