RENAISSANCE REVIEW

Imagine the Look, Create the Dream...

We have some exciting new treatments to offer. These include hair transplantation to the eyebrows, and Juvederm injections. Stay tuned for more exciting additions to our practice as we head into season...

On behalf of the entire staff at the Aesthetic Surgery Center, we wish you and your loved ones a joyous holiday season.

HOT OFF THE PRESSES: EYEBROW HAIR TRANSPLANTS!!!

Many women lose their eyebrow hair, especially in the outer half, as they age. The most common reasons for this include aggressive plucking, age, laser hair removal, and trauma. The majority of women pencil in their eyebrows with make-up or they have permanent make-up (or micropigmentation) done to treat this. Many patients are unhappy with these procedures because their eyebrows look fake and artificial. Another problem is that permanent make-up fades over months to years, so it does not look like your natural hair color.

The physicians at the Aesthetic Surgery Center are now performing a procedure in the office called "hair transplantation to the eyebrows." The procedure has been described before, but its popularity waned because of the technique that was originally used. We are now able to use microscopes to cut these fine grafts, and this has resulted in far more natural results. This is by far the most natural and long lasting way to restore eyebrows. The hairs that are transplanted last for the rest of your life and all that is required is trimming their length periodically.

Please call 239.594.9100 to find out more.

Juvederm is the Filler of Choice for Luscious Lips!

After almost 3 months of performing Juvederm injections, this new material has become Dr. Agarwal's filler of choice for lip augmentation. Patients feel that the material feels more natural than Restylane in the lips, and is far less painful after injection.

On October 29, 2006, ABC and NBC news featured Dr. Agarwal injecting Juvederm into Dr. Maloney's smile lines. Click the logo below to watch this segment.

RENAISSANCE REVIEW

Imagine the Look, Create the Dream...

Take care of your brown spots with BBL Treatments

This is the perfect time to wipe away your brown spots! Whether they are on the face, neck, chest, or hands, the BBL offers a quick solution. The procedure is performed in the comfort of our office laser suite.

The treated area can be covered with make-up the same day as there is no break in the skin. The brown spots will darken initially, and then speckle and fall off in about one and a half weeks. The procedure has soared in popularity because of its superb results.

Complimentary Healthy Skin Check!

We recommend a healthy skin check! Receive a complimentary skin evaluation from our aestheticians to monitor the changes in your skin and determine the very best antiaging program for your individual needs.

Assessment includes an overview of the newest high tech ingredients available today in skin care products. Call one of our experienced aestheticians today to schedule, and you will know you are on the right track to healthy skin!
