RENAISSANCE REVIEW

Imagine the Look, Create the Dream...

Introducing New Juvederm XC with Lidocaine for Enhanced Comfort!

Allergan, manufacturer of Juvederm Injectable Gel, has introduced a Juvederm product with Lidocaine (Juvederm XC Ultra), which results in less painful injections. Because the new product numbs the area that is treated as it is being injected, the entire injectable process is even more tolerable.

Our physicians are now using Juvederm XC (as well as Restylane) for filling smile lines, lips, and tear troughs. Call today (239) 594-9100 to schedule your treatment with this exciting new product!

If I Have a Facelift, Will it Hurt?

Patients who undergo facial plastic surgery often ask whether there will be post-operative pain. The vast majority of our patients complain of temporary tightness, swelling, and discomfort, with mild pain. Our patients are typically prescribed Darvocet or Vicodin to assist with the discomfort for the first few days.

Fortunately, pain is not a significant issue with facial plastic surgery. If you would like to speak to one of our post-operative patients firsthand, feel free to come to one of our informative seminars to meet them.

Receive \$50 off Restylane/Perlane until March 31, 2010!

Good Through March 31, 2010

Until March 31, 2010, when you receive treatment with Restylane or Perlane, you will receive a mail-in rebate for \$50 cash back for each syringe injected.

Join us for our February 25th Seminar!

Our seminars at the Ritz Carlton Beach Resort are informative and educational. Please bring a friend or family member and learn about contemporary approaches to restoring and enhancing the face and body.

This is the perfect opportunity to meet our physicians and staff in a friendly environment. There will also be post-operative patients available to share their experiences with you. Call today to reserve your seat today!
