March 2009

RENAISSANCE REVIEW

Imagine the Look, Create the Dream...

Muscle Transfer to The Lips

For permanent lip augmentation, Drs. Maloney and Agarwal utilize your own muscle, taken from the back of the neck, as a muscle transplant to the lips. This is a natural substance, never rejected, and can be customized to suit your desired lip augmentation goals.

The pictures at the top are the preoperative photos, those in the middle are at 3 weeks postoperatively, and the lower pictures are at one year postoperatively. As you can see, there is slight residual swelling at 3 weeks, with a nice contour at one year.

Call The Aesthetic Surgery Center at 800.594.9100 to find out more about this exciting, proven procedure, which gives natural results.

Save up to \$150 on your Restylane or Perlane Treatment...

If you have your Restylane or Perlane treatment between March 1st, 2009 and May 1st, 2009, you can receive a \$100 rebate on two 1-mL syringes or a \$150 rebate on three 1-mL syringes.

Restore your youthful figure with a tummy tuck!

Tummy Tuck or Abdominoplasty is one of the top five most popular plastic surgery procedures in the country. This surgical procedure is designed to remove excess skin and fat from the middle and lower abdomen, as well as to tighten the muscles of the abdominal wall.

A personal hour long consultation with Dr. Boemi, will determine if you are a good candidate for a tummy tuck. The operation is particularly helpful to women who, through multiple pregnancies, have stretched their abdominal muscles and skin beyond the point where they can return to normal. Loss of skin elasticity, which frequently occurs with weight loss, can also be dramatically improved. This month we are offering 50% off personal consultations for Body and Breast Procedures.
