Does Therapeutic Skin Care Really Matter? The Science of Retin-A...

There is extensive literature supporting the use of Retin- A (RA) in rejuvenating photoaged skin. RA results in epidermal thickening of the outer layer of skin, increased production of hyaluronan, which is a major component of skin, increased DNA synthesis, and increased cell turnover and replacement of sun damaged cells.

At the Aesthetic Surgery Center, we believe in physician directed skin care. Our board certified facial plastic surgeons work with our licensed aestheticians in formulating a simple, yet effective skin care regimen custom designed to suit your skin's needs.

Receive \$50 off Restylane/Perlane until March 31, 2010!

Until March 31, 2010, when you receive treatment with Restylane or Perlane, you will receive a mail-in rebate for \$50 cash back for each syringe injected.
