## RENAISSANCE REVIEW

Imagine the Look, Create the Dream...

### Dr. Agarwal Discusses Artefill on WinkTV

WINK NEWS.com

On Thursday, October 25th, 2007, Wink TV aired a story about the first permanent injectable filler, Artefill. They interviewed an expert from the Aesthetic Surgery Center, Dr. Agarwal, to provide information for consumers.

ArteFill is the first non-resorbable filler material to be FDA approved. It is ideal for someone who has had a filler in the nasolabial folds previously, but would like a long term solution. It is composed of polymethylmethacrylate beads, bovine collagen, and lidocaine. It does require a skin test in the forearm one month prior to injection to rule out an allergy to collagen. Call 239-594-9100 for more information.

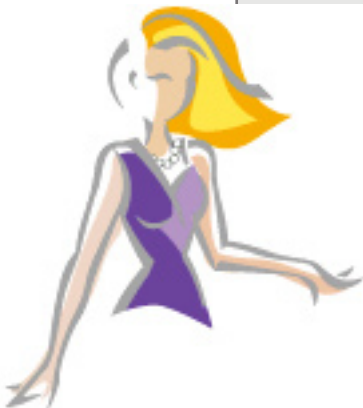

### Spruce up for the Holiday Season!

Injectables such as Botox, Restylane, Juvederm, Radiesse, and Artefill can refresh your appearance just in time for the holiday season. This is the ideal, low down-time way to look your best at all of those holiday parties!

All treatments are Physician Administered, from our double board certified Facial Plastic Surgeons. Combine injectables with an Arctic Laser Wash, and really "lift" your spirits.

### The Illuminize Peel Reveals Healthier, Glowing Skin!

Peel away signs of age to reveal healthier, glowing skin. Exposure to sun and wind naturally adds furrows and lines to your face, with a New Skin Medica Illuminize Peel treatment, we remove damaged skin cells leaving a fresh surface, texture and tone.

We welcome you back to the Face Spa and look forward to seeing you throughout the upcoming season.
