RENAISSANCE REVIEW

Imagine the Look, Create the Dream...

NEW INJECTABLE PRICES AT ASC!!!

Over the past two years, the facial plastic surgery community has seen a surge in the number of “physician extenders,” i.e. non-physicians who are performing injectables and advanced laser procedures. Many of these practitioners have taken weekend injectable courses or weekend laser courses in order to provide these services.

At the Aesthetic Surgery Center, our Double Board Certified Facial Plastic Surgeons administer all of our injectables and perform all laser procedures themselves. We believe we offer exceptional and customized care, yet with competitive prices.

Please call 239-594-9100 to schedule your treatment!

ArteFill is FDA APPROVED!!

A new option for long lasting wrinkle correction!

We are excited to add ArteFill to our injectable armamentarium. This is the first non-resorbable filler material to be FDA approved. It is ideal for someone who has had a filler in the nasolabial folds previously, but would like a long term solution. It is composed of polymethylmethacrylate beads, bovine collagen, and lidocaine. It does require a skin test in the forearm one month prior to injection to rule out an allergy to collagen.

The way that it works is that the bovine collagen is gradually resorbed over a period of 2-3 months, and the PMMA beads serve as a scaffold for your own collagen growth. Most commonly, a touch-up treatment is required at about 3 months, but after this, the results continue to improve over time. Data from long term follow-up in Canada and Europe demonstrate persistent improvement from 1 to over 5 years! Although the cost is higher than other fillers, it is offset by the reduced number of treatments required.

RENAISSANCE REVIEW

Imagine the Look, Create the Dream...

Arctic Peel is the Next Step Up from Microdermabrasion

Refresh your skin with the weekend peel - \$450

This is a physician administered laser peel, also known as the Arctic Peel, or the Weekend Peel. This lunchtime laser peel uses nothing more than blown chilled air to cool the skin. No anesthesia is required, and the procedure takes 20 minutes. Mild redness is expected afterward, and patients typically return to work the following day. Best for those people who are beginning to see the results of sun damage and aging on their face but really don't require an aggressive laser resurfacing procedure (or don't have the time for one). Specific benefits for aged and photo-damaged skin include improvement in fine lines and wrinkles, reduction of brown spots and scars, and an overall tightening of the skin. Make-up will go on smoother and you will feel and look younger.

Ideally, this procedure is done as a series of treatments, but even one treatment will give you skin that feels smoother to the touch and make-up that goes on smoother

Get ready for those backless dresses

Whether you are a woman who wants to wear a backless dress or a man trying to impress a woman in a backless dress, a cleansing back treatment is for you!

Call one of our aestheticians, Sharon or Brandi, to find out how to achieve a smooth and sexy back.
