

The Aesthetic Surgery Center & Face Spa

11181 Health Park Blvd | Naples, Florida 34110 | 800.594.7472

Summer 2007

RENAISSANCE REVIEW

Imagine the Look, Create the Dream...

Greetings!

Summertime in Naples can be the perfect time to have your facial plastic surgery. Enjoy the serenity and break in your social schedule.

Perlane is the latest filler to gain FDA Approval!!

Before

After

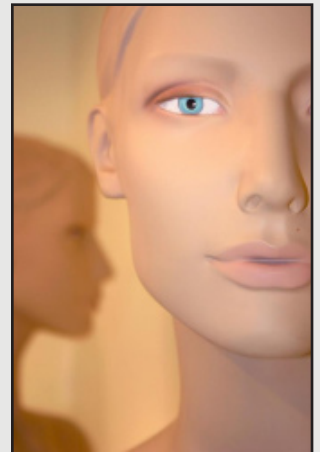

In May of 2007, the FDA approved Perlane as a filler for moderate to severe facial folds and wrinkles. Perlane is in the same family of products as Restylane, and is meant for deeper folds and wrinkles. It has been used extensively in Canada and Europe, and is thought to last approximately 9 months.

Radiesse, Perlane, and Juvederm Ultra Plus are now the leading deep fold fillers at the Aesthetic Surgery Center. They can also be used to contour and augment the cheeks. Feel free to discuss the ideal filler materials for your face through an individual consultation with our skilled physicians.

Combined Skin Rejuvenation with Arctic Peel and SkinTyte

The latest, low down time skin rejuvenation procedure combines the advantages of the Arctic Peel with the SkinTyte procedure, synergistically. While the Arctic Peel will remove the outer 20 micrometers of your skin (working from the "outside in"), the SkinTyte will heat the deeper collagen layers to accomplish tightening (working from the "inside out").

Optimal results are obtained with a series of 3 of these combined procedures, spaced about 4 to 6 weeks apart.

New Vivite by MD Forte offers advanced exfoliation

Take your skin care to the next level at home and in our office. Vivite is the strongest of MD Forte's glycolic acid cleansers, and incorporates a manual scrub in addition to the 20% glycolic acid base. Vivite also offers a hydroquinone based product, which when used with the scrub, gives maximum exfoliation while evening out your skin tone. Call one of our Aestheticians for more information!
