Reasons to choose an endoscopic midface lift...

The major advantage that an endoscopic mid-face lift offers is in its approach. Where a traditional [facelift surgery](#) can only access this area by pulling the skin sideways, the endoscopic approach allows surgeons to pull in a natural, upward direction. Instead of the pulled look, the skin of the cheek area looks refreshed and more youthful. Through the midface lift, your facial plastic surgeon is able to work against the downward pull of gravity to give you the results you want.

Check out the therapeutic Trifecta Facial!

The Trifecta Facial was designed by our physicians and aestheticians at the Aesthetic Surgery Center as a triple age defense treatment (Dermaplaning, microdermabrasion, vitamin C firming masque).

1. First, dermaplaning is done to remove unwanted hair and peach fuzz.
2. Second, microdermabrasion is performed to exfoliate dead skin cells and create new cell turnover, coupled with a 20% glycolic peel to lower the pH of the skin and tighten pores.
3. The treatment is finished with a vitamin C firming masque to combat the effects of sun damage and reveal glowing, more youthful skin.

Please call us at 239-594-9100 to experience the new therapeutic Trifecta Facial!
