Click below to read about Mommy Makeover procedures performed by Dr. Gill!

The Mommy Makeover can reshape your body and give you a second chance at looking the way you have always wanted. A number of procedures can be included in a [Mommy Makeover](#) (breast lift, tummy tuck, liposuction), so it's important to understand what changes are possible for your body. No one knows your body better than you, so listen to yourself when it comes to designing a procedure that will address all your post-baby body needs. Bring your concerns to Dr. Gill during your [mommy makeover consultation](#) and be open to hearing her opinions. Dr. Gill can help you to put together the right surgical plan that addresses your concerns in the best and most effective way. If you would like to consult with Dr. Gill to determine the best procedure for you, please call 239-594-9100. If you click on the link below, you can read about Mommy Makeover procedures in greater detail. Take advantage of our physicians' **Specialty Driven** approach to cosmetic rejuvenation.

The Aesthetic Surgery Center is the first and only practice in Naples/Ft. Myers/Marco Island to offer ThermiTight™ to its patients.

### **ThermiTight™**

ThermiTight™ is a procedure performed by our physicians at the Aesthetic Surgery Center, utilizing the ThermiRF Radiofrequency skin tightening technology. This is a new technology whereby a fine temperature regulated probe is inserted under the skin to deliver heat directly to the dermis and subdermis. Heating of these layers has been shown to induce skin tightening by collagen contraction and remodeling. Results are seen 2 to 12 months after a single treatment. The ideal candidate has loose skin, with limited excess fat, although it is possible to combine this procedure with liposuction if desired. The most commonly treated areas are the jawline and neck, upper arms, abdominal wall, thighs, and knees. Our plastic surgeons at the Aesthetic Surgery Center are proud to be the first to offer this exciting new technology in the Naples, Fort Myers, and Marco Island area.

### **How is ThermiRF™ different from existing skin heating devices?**

Most skin heating devices seek to improve laxity of the skin and skin wrinkling by applying heat externally to the skin. The goal is to reach a target tissue temperature of 42-44°C, which has been shown to induce collagen remodeling and contraction. The problem with other devices lies in the inconsistency of results. There are some individuals who attain a subtle improvement, but there are also a large percentage of “non-responders” (those individuals who achieve no improvement). Elasticity of the skin, patient age, and other intrinsic patient factors can play a role,

making patient selection a critical component to success of the procedure. However, there are also device specific limitations. In the opinion of our plastic surgeons at the Aesthetic Surgery Center, ThermiRF™ is an advance in technology compared to all other skin heating devices. The heat is more precisely delivered to the target area with real time feedback from the ThermImageGuidance™ system, lending to consistency of results. Please call 239-594-9100 to schedule your consultation appointment and determine if this treatment is appropriate for you.

**The Aesthetic Surgery Center is the first and only practice in the Naples/Ft. Myers/Marco Island area to offer ThermiSmooth™ to its patients.**

The logo for ThermiSmooth™ features the word "THERMi" in a bold, dark blue, sans-serif font. The letter "i" is smaller and positioned between "THERM" and "Smooth". The word "Smooth" is written in a green, cursive script font. A small "TM" trademark symbol is located at the top right of the word "Smooth".

ThermiSmooth™ is a procedure performed by our licensed aestheticians at the Aesthetic Surgery Center, utilizing the ThermiRF™ Radiofrequency skin tightening technology. During a series of 4 weekly sessions, a temperature regulated probe is applied externally to the skin in order to heat the skin to the desired level (42-44°C). Most procedures take about 30-45 minutes. ThermiSmooth™ treatments can be combined with facials or microdermabrasion treatments if desired. There is mild redness and swelling for a few hours and make-up can be applied right away. This procedure can be performed on any skin type.

Heating of the skin to this temperature induces skin tightening by collagen contraction and remodeling, as well as long term stimulation of collagen production. Results are seen 2 to 12 months after the series of 4 treatments. The most commonly treated areas are the upper and lower eyelids to tighten the skin and improve fine lines, the mouth area to improve lip lines, and crepy skin along the neck. The Aesthetic Surgery Center is proud to be the first to offer this exciting new technology in the Naples, Fort Myers, and Marco Island area. Please call 239-594-9100 to schedule your series of treatments with our aestheticians, Katherine or Brittany!
