## RENAISSANCE REVIEW

Imagine the Look, Create the Dream...

**Dr. and Mrs. Maloney serve as event chairs at the 10th University of Pittsburgh Winter Academy at the Ritz Carlton!**

The 10<sup>th</sup> University of Pittsburgh Winter Academy at the Ritz Carlton was hosted by the University and event Chairs, Dr. Richard and Diane Maloney. Over 400 attendee's learned the latest in personalized health care and genomic research. Dr. Richard and Diane Maloney hosted the Winter Academy 'kick-off' reception at the Old Collier Golf Club for the University of Pittsburgh.

**Pictured left to right:** Arthur S. Levine, MD, Senior Vice Chancellor and John and Gertrude Petersen Dean, School of Medicine, Richard Maloney, MD, and Edward Scherder, DMD.

**Click below to read about Body Contouring procedures after weight loss, performed by Dr. Gill!**

Your body contouring surgery will be customized to suit your body's unique needs and your own desired results. It may include just one procedure or several, as determined by you and Dr. Kiranjeet Gill. Some of the procedures that are typically chosen by patients after significant weight loss include:

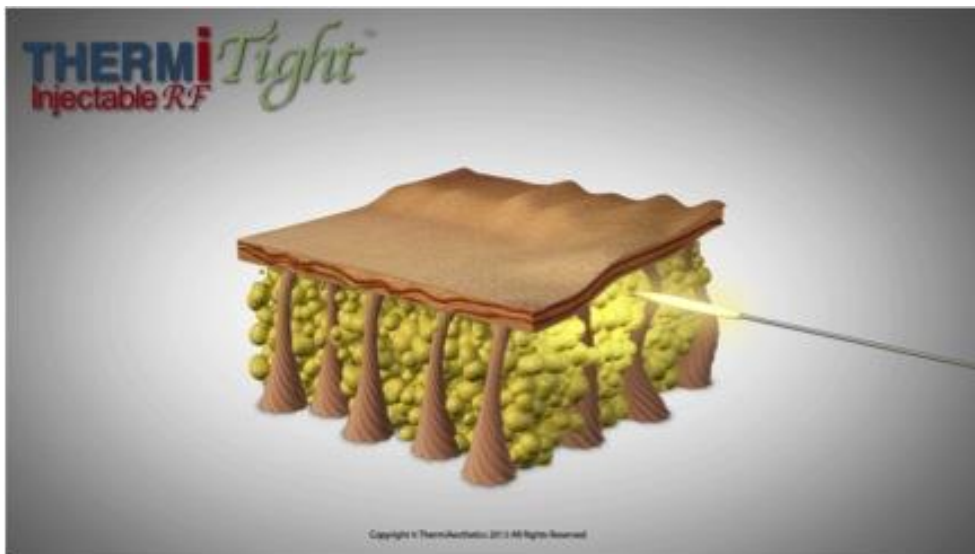

- **Breast lift surgery**, which is designed to lift sagging breast tissue and trim away excess skin. Breast lift patients can achieve improved breast shape, position, and tone.
- **Tummy tuck surgery**, or abdominoplasty, which addresses concerns with loose skin and muscles as well as fatty tissue left behind after weight loss.
- **Body lift surgery**, the most popular post-weight loss surgery. It can be used to remove excess skin and fat from the back, flanks, and abdomen all at once. On average, patients can lose an additional 10-15 pounds of tissue and achieve a more toned appearance.
- **A thigh lift**. This procedure concentrates on lifting and contouring the skin and tissue of the thighs. This area is particularly stubborn throughout the weight loss process and is a very common target for surgery.

- [Arm lift or brachioplasty](#), a procedure which targets excess skin and fat of the arms. This procedure can reverse the so-called “bat wings” that are a common side effect of changes in weight as well as aging.

To begin your own journey toward a better-contoured body following weight loss, contact the Aesthetic Surgery Center to book an appointment with [Dr. Kiranjeet Gill](#) (239-594-9100)

**The Aesthetic Surgery Center is the first and only practice in Naples/Ft. Myers/Marco Island to offer [ThermiTight™](#) to its patients.**

### **ThermiTight™**

ThermiTight™ is a procedure performed by our physicians at the Aesthetic Surgery Center, utilizing the ThermiRF Radiofrequency skin tightening technology. This is a new technology whereby a fine temperature regulated probe is inserted under the skin to deliver heat directly to the dermis and subdermis. Heating of these layers has been shown to induce skin tightening by collagen contraction and remodeling. Results are seen 2 to 12 months after a single treatment. The ideal candidate has loose skin, with limited excess fat, although it is possible to combine this procedure with liposuction if desired. The most commonly treated areas are the jawline and neck, upper arms, abdominal wall, thighs, and knees. Our plastic surgeons at the Aesthetic Surgery Center are proud to be the first to offer this exciting new technology in the Naples, Fort Myers, and Marco Island area.

### **How is ThermiRF™ different from existing skin heating devices?**

Most skin heating devices seek to improve laxity of the skin and skin wrinkling by applying heat externally to the skin. The goal is to reach a

target tissue temperature of 42-44°C, which has been shown to induce collagen remodeling and contraction. The problem with other devices lies in the inconsistency of results. There are some individuals who attain a subtle improvement, but there are also a large percentage of “non-responders” (those individuals who achieve no improvement). Elasticity of the skin, patient age, and other intrinsic patient factors can play a role, making patient selection a critical component to success of the procedure. However, there are also device specific limitations. In the opinion of our plastic surgeons at the Aesthetic Surgery Center, ThermiRF™ is an advance in technology compared to all other skin heating devices. The heat is more precisely delivered to the target area with real time feedback from the ThermallmageGuidance™ system, lending to consistency of results. Please call 239-594-9100 to schedule your consultation appointment and determine if this treatment is appropriate for you.

**The Aesthetic Surgery Center is the first and only practice in the Naples/Ft. Myers/Marco Island area to offer ThermiSmooth™ to its patients.**

The logo for ThermiSmooth™ features the word "THERMi" in a bold, dark blue, sans-serif font. The letter "i" is stylized with a red dot. To the right of "THERMi" is the word "Smooth" in a green, cursive script font. A small "TM" trademark symbol is positioned at the end of "Smooth".

ThermiSmooth™ is a procedure performed by our licensed aestheticians at the Aesthetic Surgery Center, utilizing the ThermiRF™ Radiofrequency skin tightening technology. During a series of 4 weekly sessions, a temperature regulated probe is applied externally to the skin in order to heat the skin to the desired level (42-44°C). Most procedures take about 30-45 minutes. ThermiSmooth™ treatments can be combined with facials or microdermabrasion treatments if desired. There is mild redness and swelling for a few hours and make-up can be applied right away. This procedure can be performed on any skin type.

Heating of the skin to this temperature induces skin tightening by collagen contraction and remodeling, as well as long term stimulation of collagen production. Results are seen 2 to 12 months after the series of 4 treatments. The most commonly treated areas are the upper and lower eyelids to tighten the skin and improve fine lines, the mouth area to improve lip lines, and crepey skin along the neck. The Aesthetic Surgery Center is proud to be the first to offer this exciting new technology in the Naples, Fort Myers, and Marco Island area. Please call 239-594-9100 to schedule your series of treatments with our aestheticians, Katherine or Brittany!
