## RENAISSANCE REVIEW

Imagine the Look, Create the Dream...

**ThermiTight featured on the Today Show on August 4, 2015 as impressive new non-invasive technology!**

ThermiTight™ was featured this week on the Today show as part of its series on new and exciting non-surgical treatments to improve neck laxity!

ThermiTight™ is a procedure performed by our physicians at the Aesthetic Surgery Center, utilizing the ThermiRF Radiofrequency skin tightening technology. This is a new technology whereby a fine temperature regulated probe is inserted under the skin to deliver heat directly to the dermis and subdermis. Heating of these layers has been shown to induce skin tightening by collagen contraction and remodeling. Results are seen 2 to 12 months after a single treatment. The ideal candidate has loose skin,

with limited excess fat, although it is possible to combine this procedure with liposuction if desired. The most commonly treated areas are the jawline and neck, upper arms, abdominal wall, thighs, and knees. Our plastic surgeons at the Aesthetic Surgery Center are proud to be the first to offer this exciting new technology in the Naples, Fort Myers, and Marco Island area. Please click on the link below to watch our doctors at work...

## **Am I a candidate for a tummy tuck?**

**By: Dr. Kiranjeet Gill**

Tummy tuck surgery, also called abdominoplasty, can deliver incredible results in the right patients. Those who have struggled to keep their abdomens lean and trim through diet and exercise can be frustrated by stubborn pockets of fat and saggy skin that don't seem to budge. Age, weight fluctuations, and pregnancies can all contribute to the changing shape of the abdomen, including the collection of fatty tissue and the weakening of abdominal muscles. If you've been considering a tummy tuck

surgery of your own, some of these reasons for surgery might sound familiar.

To schedule a consultation to learn about tummy tuck surgery, please contact the Aesthetic Surgery Center to book an appointment with [Dr. Kiranjeet Gill](#) (239-594-9100)

## Fight sun damage this summer with Vitamin C and hydrate your skin with hyaluronic acid!

Our two featured products for the month of August are SkinCeuticals Vitamin C serum and B5 Hydrating Gel. These are two products that can be added to your daily skin care regimen, which will yield significant results. 2 key ingredients for anti-aging are Vitamin C and Hyaluronic Acid. These are both natural ingredients that work together to reduce wrinkles and fine lines at a cellular level - below the surface of the skin, which is why they're so effective.

Vitamin C penetrates deep into the damaged skin and stimulates new collagen, making the skin appear more plump and firm. Hyaluronic Acid, when combined properly with Vitamin C, can make your skin look decades younger. Hyaluronic Acid works by attracting moisture and it is a natural sugar molecule found in the skin. It can hold up to 1000 times its weight in water, making it a natural skin plumper. Hyaluronic Acid helps your skin

repair and regenerate itself after suffering from dryness, environmental stresses, and irritation.

Call today to schedule your complimentary skin care consultation and let us help you put your best face forward!!!!
