Trained Plastic Surgeon

Please join us at our office in Naples on Tuesday evening, March 22, 2016 for an informative seminar about contemporary approaches to restore and enhance the face and body. Our plastic surgeons, Dr. Agarwal, Dr. Maloney, and Dr. Gill, will review topics such as the new AcuPulse™ Fractional CO<sub>2</sub> laser wash resurfacing, UltraShape<sup>R</sup> Ultrasonic non-surgical fat reduction, endoscopic facelifts, laser eyelid surgery, finesse rhinoplasty, the low down time Uplift™ procedure, Thermi™ Radiofrequency skin tightening, hair restoration, injectables, breast enhancement, body contouring, and liposuction.

Refreshments will be offered from 5:30 to 6pm, to be followed by the presentation at 6pm. Immediately after the presentation, Dr. Agarwal will perform a live demonstration of the new AcuPulse™ Fractional CO<sub>2</sub> laser wash treatment. Please call 239-594-9100 to RSVP or visit our website by clicking the link below...

**Check out what our patients are saying about UltraShape™!**

***"I lost an inch off my waistline after one treatment!"***

***"My clothes are looser....time for a new wardrobe!"***

***"Why stop after three treatments? I want to keep going!"***

With the myriad of non surgical fat reduction devices on the market, choosing one can be difficult. The ideal non invasive body contouring treatment should be:

- Painless
- Permanent
- Effective

The Aesthetic Surgery Center is the only provider of UltraShape™ in Naples and Marco Island, Florida. Unlike other nonsurgical devices that use heat or freeze fat, UltraShape™ is the only FDA approved nonsurgical fat reduction device that uses pulsed, focused ultrasound to destroy fat cells. Administered by our highly skilled, licensed aestheticians, UltraShape™ has the potential to reduce your waistline by up to 2 inches after 3 simple in-office treatments. Once each treatment is complete, you can immediately go back to your daily activities without downtime or restrictions.

Please call us at 239-594-9100  239-594-9100 to schedule your appointment!

**The neck is the most aging part of a person's face...**

The first signs of aging are often noticed in one's neck and jawline. We have all looked in the mirror and seen a little looseness from the side, or a little extra fullness under the chin. The Uplift™ Facelift is the ideal way to rejuvenate the jawline and neck. This low down-time yet long lasting procedure differs from most of the other 'mini-lifts' because it is not simply a skin suspension procedure or a simple SMAS (superficial musculoaponeurotic system) suturing procedure. The UpLift™ involves tightening of the support system of the face.

Please view our before and after photos by clicking on the link below. You will see how much younger our patients look just by rejuvenating the jawline and neck! Please call 239-594-9100 to schedule your consultation and look as good as you feel!

## **Technology that ushers in a new era in Laser Wash™ resurfacing!**

We are excited to offer the latest generation of CO<sub>2</sub> laser technology...AcuPulse™ Fractional CO<sub>2</sub> laser resurfacing involves treating a fraction of a given skin surface area, instead of the entire area. By delivering focused microscopic columns of ablative energy, there are intact areas of skin left behind which help the skin heal faster than traditional resurfacing. AcuPulse's™ SuperPulse™ technology enables the deepest penetration with the lowest energy. This low energy requirement

combined with interspersed areas of intact skin reduces patient discomfort, downtime and risk of side effects.

This exciting new technology means that you will achieve superficial and deep wrinkle improvement, blending of acne scars, and treatment of sun damage with minimal down time or discomfort. The procedure is performed in the office as a standalone procedure, or can be performed at the same time as a surgical procedure such as a facelift. Downtime ranges from 3-7 days, depending on the depth of resurfacing performed and the goals of the procedure. Mild pink discoloration may last another one week, which is significantly less than fully ablative procedures. The treatment may be applied to the neck using more conservative settings to achieve textural improvement.

Please call 239-594-9100 for an individual consultation!
