July 2016

RENAISSANCE REVIEW

Imagine the Look, Create the Dream...

Dear [fname],

Excitement is building as we watch rapid progress on our new building!

Progress continues on our beautiful new building, slated for completion mid-August 2016. The new space will feature a larger space to accommodate our growing practice, a full operating room for cosmetic surgery procedures, and a more private spa environment. The office is located at 1175 Creekside Parkway, Naples, FL 34108. It is very close to

our existing location, where our practice has been and flourished over the past 22 years.

As we are now one month away from completion, we will keep you updated as to the building progress and exact move-in date. We are very excited about this new era for our practice! We will strive to ensure that this new facility reflects our practice philosophy in providing top notch plastic surgery care to all of our patients.

What is an Endoscopic Facelift vs. Traditional Facelift?

One big difference between a traditional facelift and an endoscopic facelift is the area that the surgeon can reach when performing the procedure. A traditional surgery focuses on the lower portion of the face, including the jowls, cheeks, and chin. During an endoscopic procedure, the endoscope allows a surgeon to reach more areas, such as the middle of the face (midface) and the area between the eyebrows. In some cases, the endoscopic facelift is performed at the same time as a lower face and neck lift. Please click the link below to learn more about the key differences between an endoscopic and traditional facelift procedure. For an individual consultation with one of our skilled plastic surgeons, please contact 239-594-9100.

What breast augmentation can and can't do for you...

When you think of plastic surgery, what's the first procedure that pops into your mind? Probably breast augmentation, one of the most popular cosmetic surgeries in the US. Since it is so popular, there tends to be a lot of information out there about breast augmentation. There's also a number of assumptions and misconceptions about breast surgery. Having realistic expectations for your surgery and knowing what breast implants can and can't do for you will help you make the most of your procedure and its results.

Please click on the link below to read our latest blog about Breast Augmentation. If you would like to consult with Dr. Kiranjeet Gill, please call 239-594-9100 today!
