July 2017

## RENAISSANCE REVIEW

Imagine the Look, Create the Dream...

Dear [fname],

Congratulations to our own Dr. Kiran Gill! She is featured in the July 2017 Ebella magazine article titled, "#ILookLikeASurgeon"

### LOCAL SURGEONS TAKE ON THE CHALLENGE

Local female surgeons answer the worldwide call to bring awareness to gender stereotypes.

*The New Yorker* featured four female surgeons on its cover in early April, with a story dedicated to challenging stereotypes about their profession. A #NYerCoverChallenge was issued and has gone viral both nationally and internationally. In July 2017, *Ebella* magazine recognized 8 local female surgeons, one of which was our own Dr. Kiran Gill! The article highlighted unique challenges that women surgeons often face. We are proud to have Dr. Gill featured and extend her our heartiest congratulations!

## How to appear rested with these surgical options?

Has anyone ever told you that you look tired? If you're not actually tired, hearing those words sends the message that you're doing something wrong.

But in many cases, a tired look, whether it's bags under your eyes or a heavy brow, is something beyond your control. You might be getting a full eight hours of sleep every night. Often, a tired look develops as a result of the signs of aging. Some people naturally develop bags under their eyes or dark circles as they get older.

The good news is that a number of surgical procedures can help you look well rested. Which surgery is right for you depends on your particular concerns. You might be able to combine procedures to get the best results and to look as well rested as possible.

Blepharoplasty to take care of sagging eyelid skin or puffy lower eyelids, fat transfer or Volbella or Restylane for under eye hollowing, an endoscopic browlift to lift droopy eyebrows which cause hooding of the upper eyelid, and the Uplift for sagging jowls are all options to refresh your appearance.

Please click on the link below to read more about these four rejuvenating procedures or call 239-594-9100 to schedule your consultation.

## Fat transfer for under eye hollowing and deflated cheeks...

Many times, fat loss under the eyes can be perceived as having "bags". However, removal of "bags" in this case will lead to hollow eyelids that look even more aged. Sometimes, the solution is to restore volume with fat transfer. In this photo, see how adding fat under the eyes along with laser resurfacing to tighten skin makes the lower eyelid look more youthful.

Click on the link below to review fat transfer before and after photos. Please contact the Aesthetic Surgery Center to book an appointment with one of our board certified plastic surgeons (239) 594-9100.

\*Individual results may vary. Consult your treatment provider.

SYNERON-CANDELA

The ideal UltraShape® candidate is an individual dedicated to a healthy lifestyle with troublesome areas of fat that are resistant to diet and exercise. UltraShape® permanently destroys fat using focused ultrasound energy, targeting the stubborn fat cells beneath the skin surface and causing them to cavitate and mechanically rupture. Once ruptured, the fat cells are permanently destroyed and the contents absorbed and cleared by the body.

Three treatments spaced two weeks apart are recommended for ideal results. Our patients have experienced an average of 1-2 inches of reduction of their waistline! From June 1, 2017 through August 31, 2017, receive \$500 off of your package of 3 treatments. A consultation with Dr. Gill will help you determine if this treatment is right for you. Please call 239-594-9100 to schedule your appointment!

Take advantage of no down time ThermiSmooth wrinkle tightening treatments this summer!

**THERMI***Smooth*<sup>™</sup>

ThermiSmooth<sup>™</sup> is a procedure performed by our licensed aestheticians at the Aesthetic Surgery Center, utilizing the ThermiRF<sup>™</sup> Radiofrequency skin tightening technology. During a series of 4 weekly sessions, a temperature regulated probe is applied externally to the skin in order to heat the skin to the desired level (42-44°C). Heating of the skin to this temperature induces skin tightening by collagen contraction and remodeling, as well as long term stimulation of collagen production. Results are seen 2 to 12 months after the series of 4 treatments. A maintenance treatment every 6 months can help improve results further and have preventative benefit in terms of preventing development of fine lines and wrinkles.

Our patients have seen improvements in fine upper lip lines and tightening of crepey skin around the eyelids. All with no downtime! Please call 239-594-9100 to schedule your appointment with Katherine, our licensed medical aesthetician!
