Watch Dr. Agarwal's Rhinoplasty video on "How to refine a bulbous nasal tip"

One of the most commonly sought changes in rhinoplasty surgery is refining the nasal tip to make the tip smaller. In this video, Dr. Agarwal

explains his technique for reducing the size of the nasal tip during rhinoplasty surgery, all through an internal or endonasal approach. Please click on the link below to watch the entire video. Warning: The video depicts actual surgical footage and is graphic.

If you are interested in a rhinoplasty, please call 239-594-9100 to schedule your consultation.

SYNERON • CANDELA

The advertisement is a vertical poster. The top half features a woman in a purple sports bra and black leggings performing a crunch on a gym machine, with a blue exercise ball nearby. The text 'A ZILLION CRUNCHES' is centered above her. Below this image is a purple circle with the word 'OR' in white. The bottom half shows a doctor in a white coat examining a woman lying on a treatment table. The text 'A FEW PULSES' is centered above the doctor. Below the image, there is a paragraph of text, a list of benefits in bold, the UltraShape logo, a call to action, and a disclaimer. At the very bottom, the Syneron Candela logo is visible.

The ideal UltraShape® candidate is an individual dedicated to a healthy lifestyle with troublesome areas of fat that are resistant to diet and exercise. UltraShape® permanently destroys fat using focused ultrasound energy, targeting the stubborn fat cells beneath the skin surface and causing them to cavitate and mechanically rupture. Once ruptured, the fat cells are permanently destroyed and the contents absorbed and cleared by the body.

Three treatments spaced two weeks apart are recommended for ideal results. Our patients have experienced an average of 1-2 inches of reduction of their waistline! From June 1, 2017 through August 31, 2017, receive \$500 off of your package of 3 treatments. A consultation with Dr. Gill will help you determine if this treatment is right for you. Please call 239-594-9100 to schedule your appointment!

Take advantage of no down time
ThermiSmooth wrinkle tightening treatments
this summer!

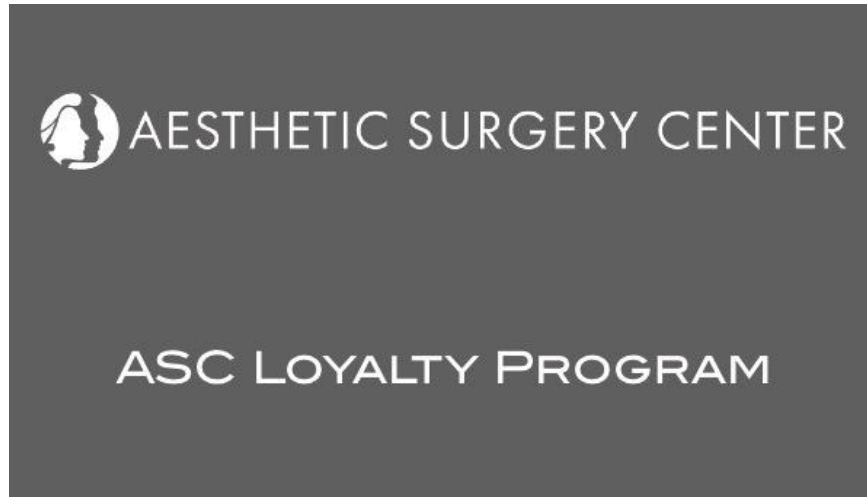

THERMiSmooth™

ThermiSmooth™ is a procedure performed by our licensed aestheticians at the Aesthetic Surgery Center, utilizing the ThermiRF™ Radiofrequency skin tightening technology. During a series of 4 weekly sessions, a temperature regulated probe is applied externally to the skin in order to heat the skin to the desired level (42-44°C). Heating of the skin to this temperature induces skin tightening by collagen contraction and remodeling, as well as long term stimulation of collagen production. Results are seen 2 to 12 months after the series of 4 treatments. A maintenance treatment every 6 months can help improve results further and have preventative benefit in terms of preventing development of fine lines and wrinkles.

Our patients have seen improvements in fine upper lip lines and tightening of crepey skin around the eyelids. All with no downtime! Please call 239-594-9100 to schedule your appointment with Katherine, our licensed medical aesthetician!
