RENAISSANCE REVIEW

Imagine the Look, Create the Dream...

It's time for a new season in Naples, Florida! Please join us at the Naples Beach Hotel and Golf Club on Thursday, November 2nd at Noon for our first seminar of the 2017/2018 season.

Please join us at the Naples Beach Hotel and Golf Club on Thursday, November 2, 2017 for an informative seminar about contemporary approaches to restore and enhance the face and body. Our plastic surgeons, Dr. Agarwal, Dr. Maloney, and Dr. Gill, will review topics such as endoscopic facelifts, laser eyelid surgery, finesse rhinoplasty, the low down time Uplift™ procedure, hair restoration, injectables, breast enhancement, body contouring, liposuction, AcuPulse™ Fractional CO₂ laser wash resurfacing, UltraShape^R Ultrasonic non-surgical fat reduction, and Thermi™ Radiofrequency skin tightening.

Note: This seminar is at the Naples Beach Hotel and Golf Club, not at the Ritz Carlton Beach Hotel

Lunch will be served at noon, with the presentation to follow. Please call 239-594-9100 to RSVP or visit our website by clicking the link below...

Skilled, state of the art permanent makeup by Candis Howell!

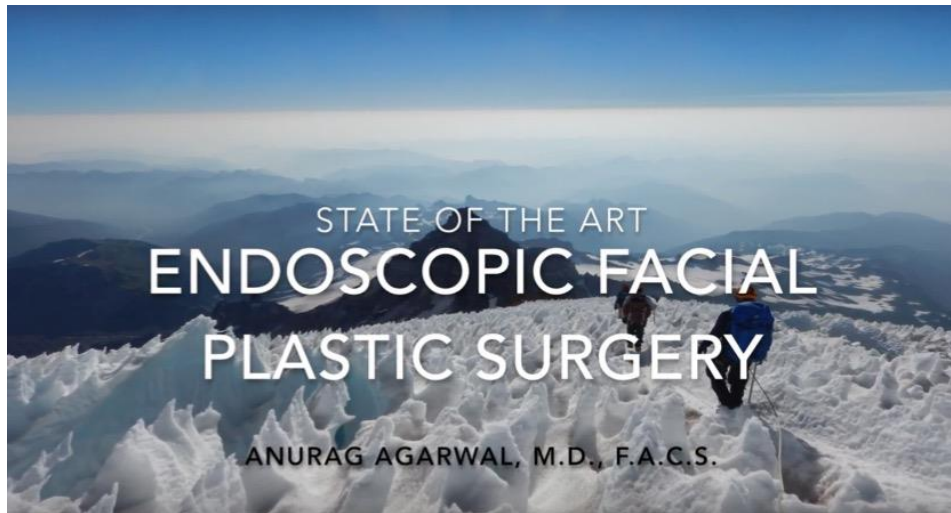

These days, permanent makeup is performed in a variety of settings by individuals with varying skill levels and training. It is of utmost importance to have this procedure performed in a medical environment, with attention to safety, cleanliness, and artistic application of the pigment. Permanent makeup is a cosmetic technique which deploys permanent pigmentation into the dermal layer of the skin (2nd layer). It produces designs that resemble makeup, such as eyeliner, fuller lips/lip liner, and your desired shape and fullness for eyebrows. With maintenance and proper home care, you can have natural looking makeup at all times.

Candis Howell is one of our licensed aestheticians and a skilled, experienced permanent makeup artist. With her keen eye for detail and technical expertise, she has conquered the 3D hair stroke to give you very natural appearing eyebrows. Her lip liner and eyeliner technique is impeccable.

Please call 239-594-9100 to schedule your permanent makeup consultation and treatment with Candis. You will feel at ease in our medically directed and supervised Skin Spa.

What is an Endoscopic Facelift? Dr. Agarwal explains in this video...

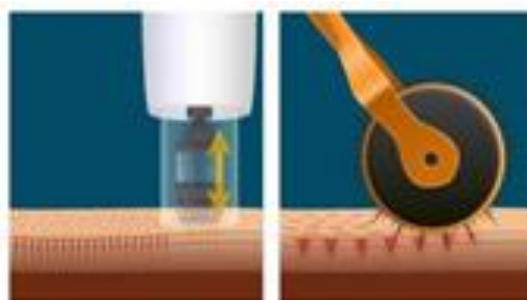

In this video, Dr. Agarwal explains when endoscopes are used for facelift surgery and why. Generally speaking, endoscopic facial plastic surgery allows rejuvenation of drooping forehead/eyebrows and cheeks through small incisions, with magnified superior visualization, and provides natural appearing results. By clicking the link below, you can watch Dr. Agarwal explain this in greater detail.

Please call 239-594-9100 to schedule your endoscopic facelift consultation with one of our board certified surgeons.

Stimulate your skin's collagen production with a package of micro-needling treatments!

Micro-needling is a minimally invasive skin-rejuvenation procedure that involves the use of a device that contains fine needles. The needles are used to puncture the skin to create a controlled skin injury. Each puncture creates a channel that triggers the body to fill these microscopic wounds by producing new collagen and elastin. Through this process, there is improvement in skin texture and firmness, as well as reduction in scars,

pore size, and stretch marks. Micro-needling is a safe, chemical-free method that triggers new collagen with advanced serums used with the process.

How many sessions will it take to see a difference?

- The number of needling sessions depends on the individual skin condition.
- Three or four treatments may be recommended for mild to moderate acne scarring, whereas deeper scars and stretch marks may require upward of five treatments.
- An interval of 3 to 4 weeks between treatments is typically recommended.
- After receiving desired results, maintenance is recommended once a year.

Micro-needling costs \$300 per treatment session. If you purchase a micro-needling package of 3 treatments, the cost is \$750 total (\$50 savings per session).

Please call 239-594-9100 to schedule your appointment!

5 things to know about the Brazilian Butt Lift!

People have become more interested in Brazilian Butt Lift surgery recently due to an increased interest in round, full backsides. You might also be interested in the surgery if you've lost some volume from the buttocks thanks to weight loss or pregnancy. The aging process can also leave you with a flatter derriere. Some women have smaller butts naturally, thanks to

their genes. Whatever your reason for being interested in a Brazilian Butt Lift, here's what you need to know about it.

Generally speaking, a Brazilian butt lift can take anywhere from two to three hours. That's because multiple steps—three in all—are part of the procedure.

The first step involves taking some fat from one area of your body using [liposuction](#) to harvest the fat. You can sculpt and slim down a problem area, like the love handles or thighs, while augmenting the buttocks.

Once your surgeon has harvested the fat, it's time to purify it. The fat is processed can be processed using several different techniques, which ultimately separates the usable cells from the non-usable ones. The usable cells are then put into a syringe.

The last step of the process involves carefully injecting the fat into the buttocks to create the desired shape and to increase the volume of the backside to the desired amount.

To schedule your consultation with Dr. Gill for this procedure, please contact the Aesthetic Surgery Center at 239-594-9100.

More details about this procedure can be found by clicking the link below:
