AESTHETIC SURGERY CENTER

NO SPRINGING FORWARD
WITH SIGNS OF AGING!

*A Fat Transfer can restore
volume & youthful contours.*

(239)-594-9100

Facial fat transfer is an exciting procedure that allows us to volumetrically augment the face, and restore its youthful, full contours. It is well documented that the process of aging involves fat atrophy as well as descent of fat pads. Fat transfers can be performed to improve cheek fullness, fill in facial hollows or depressions, restore volume to the eyelids, and refine the jawline.

AESTHETIC SURGERY CENTER

OUT WITH THE OLD,
IN WITH THE NEW!

*Love your refreshed appearance
after an UpLift Facelift.*

(239)-594-9100

This low down-time facelift is ideal for those individuals with sagging tissues along the jawline and upper neck. It differs from most of the other 'mini-lifts' because it is not simply a skin suspension procedure or a simple SMAS (superficial musculoaponeurotic system) suturing procedure. The UpLift Facelift involves complex neck reconstruction with a muscle reattachment procedure, liposuction if needed, as well as tightening of the support system of the face (the superficial musculoaponeurotic system or SMAS) with a SMAS flap. Incisions are hidden inside the ear, around the earlobe, and under the chin.

*Each patient is unique and individual results may vary.

BOOK YOUR CONSULTATION
