lip lift

Dr. Agarwal performed an in-office subnasal lip lift to achieve her goals.

Notice that the length of the upper lip is less flat, vertically shorter, and you can see more of her upper red lip.

the trifecta facial

\$185

First, dermaplaning is done to remove unwanted hair and peach fuzz.

Second, microdermabrasion is performed to exfoliate dead skin cells and create new cell turnover, coupled with a 20% glycolic peel to lower the pH of the skin and tighten pores.

The treatment is finished with a vitamin C firming masque to combat the effects of sun damage and reveal glowing, more youthful skin.
