VASER® Liposuction is a cosmetic procedure that uses ultrasound technology to gently break down fat cells allowing for more improved shape, contour and definition to the treated areas. Dr. William A. Ross used the VASER® liposuction machine to perform bodysculpting for this 42 year old woman. Click on the link below to see more photos of Vaser liposuction results!

BRIGHT EYES is a treatment geared toward improving the entire eye area. Radio Frequency (ThermiSmooth™ to the eyelids) heat energy is applied over the eye area including the upper and lower eyelids. The combination of anti-aging radiofrequency (RF) plus topical products that are applied at the time of the service will add a radiant glow to the service. This is great for chronic dry eyes and sagging eyelids. There is no down time and your results are immediate. Treatment includes a brow and lip finish so you are ready for action when you leave. **Brighten. Lift. Refine. Hydrate.**
