ANURAG AGARWAL, MD, FACS | RICHARD W. MALONEY, MD, FACS | WILLIAM A. ROSS, MD

1175 Creekside Parkway, Suite 100, Naples, FL 34108 | (239) 594 9100 | www.aestheticsurgerycenter.com

Sometimes a simple adjustment can change the way people perceive you. In this case, this beautiful 55 year old woman had very low inner eyebrows, which gave her a stern appearance. While this could be managed three times a year with Botox, Dr. Anurag Agarwal performed an endoscopic brow lift on her to give her a long-term result. Dr. Agarwal chose to preferentially lift the inner eyebrows, through minimal access incisions behind the hairline. Notice how there is no change in her hairline or forehead height, and no visible hairline scars. She is a very happy person and her eyes now show it. Click below to learn about endoscopic forehead and brow lifting!

INCISION ENDOSCOPIC BROW LIFT](#)

This is a very pleasant 33 year-old female who presented with complaints of excess fatty tissue on her abdomen, in spite of her dieting and exercise efforts. She felt very self-conscious about this, particularly after the birth of her children. Dr. Ross performed VASER® liposuction of her upper and lower abdomen to address these concerns.

To learn about what VASER® liposuction can do for you, please call 239-594-9100 and make an appointment to discuss your specific goals.

ThermiSmooth™ is a procedure performed by our licensed aestheticians at the Aesthetic Surgery Center, utilizing the ThermiRF™ Radiofrequency skin tightening technology. During a series of 4 weekly sessions, a temperature regulated probe is applied externally to the skin in order to heat the skin to the desired level (42-44°C). Heating of the skin to this temperature induces skin tightening by collagen contraction and remodeling, as well as long term stimulation of collagen production. Results are seen 2 to 12 months after the series of 4 treatments. The most commonly treated areas are the upper and lower eyelids to tighten the skin and improve fine lines, the mouth area to improve lip lines, and crepy skin along the neck.
