ANURAG AGARWAL, MD, FACS | RICHARD W. MALONEY, MD, FACS | WILLIAM A. ROSS, MD

1175 Creekside Parkway, Suite 100, Naples, FL 34108 | (239) 594 9100 | [www.aestheticsurgerycenter.com](http://www.aestheticsurgerycenter.com)

Male patients want to look their best, just as female patients do. The most common facial procedures for men are an Uplift™ lower face and neck lift and upper and lower eyelid blepharoplasty. This helps to treat sagging skin and an aged appearance around the eyes. Getting rid of the "turkey gobbler" makes one look more youthful and restores a masculine jawline.

This is a 71 year old active gentleman on whom Dr. Agarwal performed an upper and lower eyelid blepharoplasty, fat transfer to the tear troughs and cheeks, fractional CO2 laser resurfacing of the lower eyelids and Uplift™ lower face and neck lift with platysmaplasty. Post-operatively, the patient stated that his neck line looked better after surgery than it did 35 years ago!

AND NECK LIFT](#)

This is a very pleasant 62 year-old female who was concerned about the appearance of her upper arms. She was very healthy, active and fit but she was very dissatisfied with the "sagging" skin on her upper arms. After a careful evaluation of her concerns, Dr. Ross recommended ultrasound-assisted liposuction combined with a brachioplasty ("arm lift") to reach her goals.

She is shown before and one month after surgery. She was very pleased with the shape of her arms and now feels comfortable in her clothing. Dr. Ross was happy to play a role in meeting her goals.

To learn about what brachioplasty can do for you, please call 239-594-9100 and make an appointment to discuss your specific goals.

Skinceuticals C E Ferulic serum is a potent topical antioxidant. Antioxidants function by absorbing damaging free radicals that are found in the skin due to pollutants and sun damage. With repeated use, the C E Ferulic serum can brighten and diminish pigmentation. Most importantly, it is your skin protection product.

Skinceuticals Resveratrol B E is a first-of-its-kind night treatment that works by inhibiting excess pigment production in the skin and reducing the inflammation in the skin that causes you to produce excess pigment. This is a non-prescription treatment that will reduce hyperpigmentation, leading to more even skin tone and radiance.

Combining the Skinceuticals C E Ferulic and Skinceuticals Resveratrol B E gives a synergistic defense against sun damage and improves excess pigmentation in the skin. By reducing the oxidative stress on the skin, this power couple gives you healthy skin.

From now through December 31, 2020, receive 30% off Skinceuticals Resveratrol BE with your purchase of Skinceuticals C E Ferulic.

Skinceuticals C E Ferulic: \$166

Skinceuticals Resveratrol B E: \$153 - 30% = \$107
