Rhinoplasty, Uplift™, Fat transfer by Dr. Agarwal

Can you believe she's 60? This lovely patient is shown before and 6 months after rhinoplasty, Uplift lower face and neck lift, and fat transfer by Dr. Agarwal

This is an example of how correcting a droopy, aging nose in conjunction with rejuvenating the jawline and neck can really turn back the clock. She looks about 20 years younger!

Read more about rhinoplasty on our website by clicking below or call 239-594-9100 to schedule your rhinoplasty or Uplift consultation with one of our plastic surgeons.

Permanent makeup is a cosmetic technique which deploys permanent pigmentation into the dermal layer of the skin (2nd layer). It produces designs that resemble makeup, such as eyeliner, fuller lips/lip liner, and your desired shape and fullness for eyebrows. With maintenance and proper home care, you can have natural looking makeup at all times. For those of you who have lost your eyebrows over time, permanent makeup can be the perfect solution.

Ilaria is a skilled aesthetician and permanent makeup artist, who provides permanent makeup and medical tattoo services to women and men of all ages, with extra specialization in areola tattooing post-mastectomy. Please click on the link below to see examples of her amazing work. This is the perfect beauty treatment for those who don't have time to complete their look due to a busy lifestyle or those who have an athletic lifestyle. You will wake up looking your absolute best.

If you would like to schedule a permanent makeup consultation with Ilaria, please call 239-594-9100 to schedule your appointment.

We will be adding a LED Skin Scope to our Skin Spa starting on May 15, 2021. When used for the appropriate patient, the LED skin scope will enable our aestheticians to evaluate skin using Ultraviolet (UV) light. When UV light is applied to the skin, the skin reflects the UV light as visible light. This visible light has different colors based on the condition of the skin.

For example, clumps of melanin in the skin are visualized as dark spots, oily skin is seen as a yellow color, dry flaky skin is visualized as a white color, etc... Based on the findings, our aestheticians can recommend an appropriate skin care regimen and Skin Spa treatments (such as microdermabrasion, chemical peels, hydrating facials, etc...). Results are most accurate if your skin is make-up free and there is no sunscreen on your skin.

Please call 239-594-9100 to schedule a skin care consultation with one of our licensed aestheticians, Katherine or Ilaria. They will help you get your skin on track and looking its best.
