What is an Otoplasty? Otoplasty aka "Ear Pinning" is a procedure to reposition protruding ears. Through an incision behind the ears, the cartilage that is prominent is folded back and permanently sutured closer to the head.

This 28 year old woman always disliked her prominent ears and camouflaged her prominent ears with her hair, due to being self-conscious about them. She is shown before and 11 months post-operatively, thrilled with her results and she now has the confidence to wear her hair in a variety of hair styles.

Abdominoplasty, also called a tummy tuck, is a cosmetic procedure designed to remove excess fat and skin and tighten the abdominal muscles to restore a youthful contour to the abdominal area. Vaser Liposuction is a cosmetic procedure that uses ultrasound technology to gently break down fat cells allowing for more improved shape, contour and definition to the treated areas.

Before:

This patient gave Dr. Casey Holmes the privilege of helping meet her goals of a flatter and more contoured abdomen. Despite losing 75 lbs. prior to surgery, she suffered from laxity of her stomach muscles and a significant amount of excess skin. Dr. Holmes was able to tighten her muscles and remove excess skin to give her the flat belly that she desired. He also performed liposuction of the flanks, to help remove that stubborn love handle fat and give her a better waist-line contour.

After:

At 4 months after surgery, the patient was back to her active lifestyle and was very happy with her results. She says she couldn't be more pleased with her results and feels confident now. Dr. Holmes was happy to help her in this process.

\* All patients are unique and individual results may vary.

## Body Rejuvenation Treatment SUMMER BOGO SPECIAL!

Skin treatments for the body can help to restore a youthful, smooth complexion to your arms, legs, and torso. All too often, skin on the body can lose its healthy glow and can benefit from enhanced cell turnover and moisturization. At the Aesthetic Surgery Center, our aestheticians will perform a Himalayan Crystal Salt Glow first, which will exfoliate and remove any dry, dead skin. This is then followed by a Gemstone Clay Body Mask, in which the clay mud helps with skin hydration, detoxification, and rejuvenation. Both of these treatments are coupled with hot gemstone therapy using the TAJ mat.

The TAJ mat enhances your local circulation and relaxes your muscles and joints. The TAJ MAT uses Hot Gemstones, Far Infrared, Negative Ions, Photon Lights, and PEMF.

### 3D Areola Restoration Tattoo:

Beautiful breasts are a symbol of femininity. After breast cancer surgery, many women lose self-confidence due to the surgical changes to their breasts.

Our permanent makeup artist, Ilaria, has mastered 3-dimensional areola tattoo restoration. 6 months after breast surgery, an areola with a natural appearance is pigmented around the nipple. The shade is matched with its ideal tone.

The two patients depicted above are just a few examples of Ilaria's work. Thanks to Ilaria, these women have renewed self-confidence and a higher quality of living.

Please call 239-594-9100 to schedule your permanent makeup consultation with Ilaria!
