What is Renuvion®?

Renuvion® is a surgical device that uses precise streams of plasma energy to contract soft tissues. The procedure has emerged as an effective option for those wishing to contour their

body without resorting to more invasive procedures that leave noticeable scars and require longer downtimes. It is most commonly performed by Dr. Holmes in conjunction with VASER® liposuction surgery.

Dr. Holmes inserts the Renuvion® probe under the skin through tiny incisions near the targeted areas or through the same incisions used for liposuction. As he moves the probe back and forth under the skin, radiofrequency (RF) energy and the Helium plasma are released to quickly heat and cool the skin from within resulting in skin contraction.

Women and men choose Renuvion® for nonsurgical skin tightening on a variety of areas, including:

- Upper back and bra line
- Upper arms
- Tummy, waist, and hips
- Buttocks
- Thighs
- Knees

Treated areas typically look firmer and toned with a reduced crepe-like appearance immediately following Renuvion® treatment. The skin will continue to tighten and smooth for 6 to 9 months as new collagen forms and the original collagen remodels.

If you are interested in learning more skin tightening on the body using Renuvion®, please call 239-594-9100 to schedule your consultation with Board Certified Plastic Surgeon, Dr. Casey Holmes.

Dr. Casey Holmes proceeds with another **SUCCESS** STORY!

Before and 3 months after this 57-year-old female patient underwent abdominoplasty (tummy tuck) and liposuction by Dr. Holmes. She suffered from laxity of her stomach muscles and excess skin of the abdomen after a 50lb weight loss journey. She also had rectus diastasis that caused a bulge in her lower abdomen. She desired a more youthful appearance and the figure that she had when she was younger. After an extensive consultation and consideration of her desires, Dr. Holmes's surgical plan helped her achieve and exceed her desired look.

Please click on the link below to read about this surgical procedure or call us at 239-594-9100 to set up a consultation with Dr. Casey Holmes.
