## FACELIFT RECOVERY PROGRESSION

Facial rejuvenation by Dr. Agarwal

AESTHETIC SURGERY CENTER

ANURAG AGARWAL, MD, FACS | RICHARD W. MALONEY, MD, FACS | CASEY HOLMES, MD

50 YEAR OLD WOMAN  
UNDERGOES  
ENDOSCOPIC BROW LIFT,  
UPLIFT™ WITH DEEP  
NECK CONTOURING, FAT  
TRANSFER TO TEAR  
TROUGHS AND CHEEKS,  
FRACTIONAL CO2 LASER  
FOREHEAD/EYELIDS/  
NOSE/UPPER LIP, RIGHT  
LOWER EYELID  
BLEPHAROPLASTY

Meet Sherry, the anesthetist who provides anesthesia to Dr. Agarwal's patients. At the age of 50, she asked Dr. Agarwal to help her treat signs of aging that she was seeing. She gave Dr. Agarwal the privilege of tracking her recovery and allowing him to show her progress, without any makeup on. While the healing varies from individual to individual, you can see how her laser sites and incisions matured over time, and the progressive resolution of swelling over the first 2 weeks and then subtle changes over the ensuing 6 months.

She is shown before and 6 months after an endoscopic forehead and brow lift, Uplift™ lower face and neck lift with deep neck contouring and reduction of submandibular glands, right transconjunctival lower eyelid blepharoplasty, fat transfer to the under eye hollows and cheeks, and fractional CO2 laser resurfacing of the eyelids, forehead, upper lip, and nose.

### **What is Renuvion®?**

Renuvion® is a surgical device that uses precise streams of plasma energy to contract soft tissues. The procedure has emerged as an

effective option for those wishing to contour their body without resorting to more invasive procedures that leave noticeable scars and require longer downtimes. It is most commonly performed by Dr. Holmes in conjunction with VASER® liposuction surgery.

Dr. Holmes inserts the Renuvion® probe under the skin through tiny incisions near the targeted areas or through the same incisions used for liposuction. As he moves the probe back and forth under the skin, radiofrequency (RF) energy and the Helium plasma are released to quickly heat and cool the skin from within resulting in skin contraction.

Women and men choose Renuvion® for nonsurgical skin tightening on a variety of areas, including:

- Upper back and bra line
- Upper arms
- Tummy, waist, and hips
- Buttocks
- Thighs
- Knees

Treated areas typically look firmer and toned with a reduced crepe-like appearance immediately following Renuvion® treatment. The skin will continue to tighten and smooth for 6 to 9 months as new collagen forms and the original collagen remodels.

If you are interested in learning more skin tightening on the body using Renuvion®, please call 239-594-9100 to schedule your consultation with Board Certified Plastic Surgeon, Dr. Casey Holmes.

## Rhinoplasty Transformation

This is a 25 year old woman who had a crooked nose since birth. It was

amazing to see her transformation almost 8 months after Dr. Agarwal performed a complex rhinoplasty with cartilage grafts to straighten her nose, refine and lift her tip, and overall give her more feminine contour to her nose.

Please click on the link below to read about rhinoplasty surgery or call us at 239-594-9100 to set up a consultation for this transformative procedure.
