Facelift by Dr. Agarwal

Dr. Agarwal's goal with every facelift is for you to still look like yourself, just refreshed and rejuvenated. A facelift should draw positive feedback about your appearance, without being detectable.

This is a beautiful 55 year old woman who had tried a series of Sculptra sessions as well as thread lifting, all of which did nothing for her. She is shown before and 7 months after Dr. Agarwal performed:

- Uplift™ lower face and neck lift with platysmaplasty
- Fat transfer to her under eye hollows and anterior cheeks
- Endoscopic outer brow lift
- Upper eyelid blepharoplasty
- Lower eyelid blepharoplasty
- Fractional CO₂ laser lower eyelids and perioral

In addition to her eyelid rejuvenation, what is most striking is the improvement in the under eye/cheek hollowing from the fat transfer, and the restoration of her heart-shaped face of youth thanks to the deep plane Uplift™ procedure. She still looks like herself, just happier and better. Facelift results are extremely technique dependent and directly tied to the skill of the performing surgeon.

Please call 239-594-9100 to schedule your facelift consultation with Dr. Agarwal.

Renuvion Skin Tightening with Vaser Liposuction Results

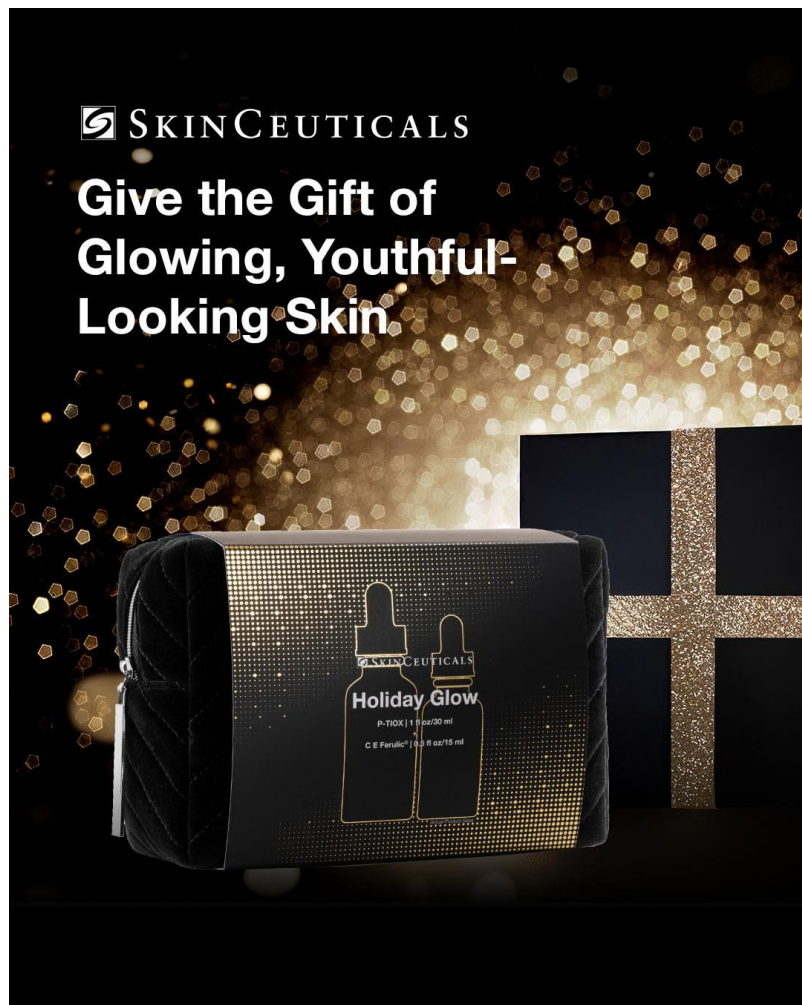

This 20 year old patient wanted excess fat removed from the abdomen and contouring to the waist. This result was accomplished by Dr. Holmes with Liposuction and Renuvion to the entire abdomen and flanks, using the new Ayon body contouring system. She is in the normal healing phase of 1 month post surgery with expected swelling.

Over the next 6 months of her healing, she will continue to notice skin tightening effects from the Renuvion.

Please call 239-594-9100 to schedule your body sculpting consultation with Dr. Holmes.
