Uplift™ lower face and neck lift by Dr. Anurag Agarwal

Uplift™ lower face and neck lift by Dr. Anurag Agarwal

Uplift™ lower face and neck lift by Dr. Anurag Agarwal

How does thin skin affect facelift results?

For most of us, the aging process results in decreased overall skin content, through the epidermis, dermis, and deeper into fatty layers. Because a skin only lift or "mini lift" doesn't release deeper facial retaining ligaments or suspend the deeper muscle layers, the results are short lived. This is where the deep plane Uplift™ excels. Thin skinned patients are also better off addressing skin sagging earlier rather than later, as the skin only thins further with age.

This is a 57 year old woman with sun damaged, thin skin who is shown before and 6 months after Dr. Anurag Agarwal performed a deep plane Uplift™ lower face and neck lift with platysmaplasty. She had a significant amount of skin pleating that needed to be redraped. She has a much smoother jawline, cheek wrinkles are better, and the neck contour has improved.

Please call 239-594-9100 to schedule your facelift consultation with one of our surgeons.

Lower eyelid rejuvenation by Dr. Agarwal

Lower eyelid rejuvenation - the ultimate trifecta of procedures

This is a 69 year old woman who saw Dr. Agarwal, specifically to address her lower eyelid bags and upper lip lines. She is shown before and 8 months after Dr. Agarwal performed his 3 favorite lower eyelid rejuvenating procedures:

1. Transconjunctival lower blepharoplasty (removes excess bulging lower eyelid fat pads)
2. Fat transfer to the tear troughs, infraorbital rims, and cheeks (Adds volume to hollow troughs under the eyes and creates a smooth, youthful lower eyelid to cheek junction)
3. Fractional CO₂ laser resurfacing of the lower eyelids (Tightens crepey lower eyelid skin without external incisions)

It's amazing how these 3 targeted procedures refreshed her overall eyelid appearance and made her look less tired. She is thrilled with her results.

Please call 239-594-9100 to schedule your blepharoplasty consultation.
