Rhinoplasty by Dr. Anurag Agarwal

Rhinoplasty Spotlight

This is a 17 year old woman who was extremely self-conscious about the dorsal bump on her nasal profile. She wanted to reduce the hump, refine the nasal tip, and lift her tip to give a more feminine contour. She is shown before and 8 months after Dr. Anurag Agarwal performed an external rhinoplasty. Post-operatively, she told Dr. Agarwal that her nose turned out better than she ever hoped for and it was the best decision she ever made. She is no longer self-conscious about her appearance and her confidence shines through.
